To [] Development & Engineering Div., Camera Works:

Reference: CRT [] Lenses

STATINTL
STATINTL

[] handled the negotiations on [] Bid AO-60-3030 for eight 50mm f/2.0 CRT [] lenses, Formula M-236 with the [] purchase order, P.O. K-19123, was subsequently issued March 3, 1960 which has been associated with [] 213,333 for the eight lenses. A reasonable delivery prediction of between July 29, 1960 and August 31, 1960 was established.

STATINTL

STATINTL

The lenses are used in pairs in the [] Electronic Rectifying Printer. Although the device is unclassified, the use for which the units are intended is a very urgent and classified project. The ultimate customer, who incidentally had recommended the [] lens to [] has asked that every effort be made to expedite lens delivery.

STATINTL

STATINTL

Could I request that 213,333 be placed on an emergency or rush basis. One rectifying unit will be ready for optics in May of 1960. If lenses could be finished and tested in pairs so that partial deliveries could be accomplished, the prime customer would receive his equipment at a much earlier date.

I would appreciate any expeditious action you might initiate and any information on a possible accelerated partial delivery schedule so that the ultimate user can be notified.
